

## **CAC Model Considerations**

### **Typical Models:**

- Private Non-Profit 501c3**
- Government Based**
- Hospital Based**
- Within an umbrella organization**

### **Things to consider when choosing an appropriate CAC model**

- **What current community resources exist (facilities/space, clinical expertise, infrastructure)?**
- **Who has resources to sustain the CAC in the long-term? Government agency, private organization, other?**
- **Is there an organization that can provide an organizational base? Is it an appropriate fit for a CAC? Would it add value to that organization, or would it be taxing?**
- **Fundraising capacity of service area? If organized as a 501c3: does this pose competition for fundraising that the service area can absorb?**
- **Research other CACs in the state and beyond that are examples of each model. Consider models with which you may not be the most familiar.**
